Year 4-Place Value

Round any number to the nearest 10, 100 or 1,000.

I have rounded a number to the nearest 100.

My answer is 900.

Can you work out what my number could be based on these clues:

My number is odd.

There is one 8 in my number.

The sum of the digits in my number total 22.

Think about the different strategies that you could use. Which sets of numbers can you eliminate immediately?
