

Can you work out and convert these Roman Numerals into digits/numbers?

- a) CXL - 140
- b) CCLIII - 253
- c) CCCLXVI - 366
- d) CDLXXIX - 479
- e) DXCII - 592
- f) DCCV - 705

**Reasoning Challenge:**

Can you now continue the pattern for the next two numbers, writing them in digits and Roman Numerals.

The number is increasing by 113 each time. Therefore the next two numbers are

818 – DCCCXVIII

931 - CMXXXI
